

CeMAT RUSSIA 2024 (September 17-19, Tuesday-Thursday).

### **CeMAT RUSSIA 2024 – exhibition of effective warehouse solutions**

From September 17 to 19, 2024, the 14th International exhibition for materials handling, warehousing equipment and logistics CeMAT RUSSIA will be held in Moscow at the Crocus Expo IEC. The CeMAT RUSSIA 2024 exhibition will again break its own record last year and become the largest in its entire history in Russia. For the first time, the exposition will be located in four halls of the first pavilion. The main topics will be robotics and effective solutions.

More than 270 exhibitors from Russia and foreign countries will present their technologies on an area of over 20 000 m<sup>2</sup>. In 2024, along with the growth of the presence of Russian companies, the number of foreign exhibitors will double compared to last year - 84 companies from Turkey, Belarus, China, India, some of which are returning again, and many are participating for the first time and will be able to enter a new sales market and consolidate their positions in Russia. The total number of companies participating in CeMAT RUSSIA for the first time is 130, which, along with the increase in the exhibition area, demonstrates the incredible demand in Russia for equipment and solutions that will be presented this year.

The exhibition will feature products from more than 400 brands and about 450 units of warehouse equipment. Among the participants of CeMAT RUSSIA: COMITAS, Jungheinrich (this year the company will be distinguished by a particularly large-scale participation at 5 stands), ASIA MH/HELI EURASIA, ISTK, FIRST LOGISTICS, NOBLELIFT RUS, AXELOT/AXELOT TECH, RackFork, EUROCARA PLUS, Trakresurs Region, Vertical, Shelving Bear and many others.

CeMAT RUSSIA continues to attract increased attention from companies from China, whose participation has increased several times compared to 2023. JAC, MIMA, ZOWELL, GENSON, CHOLIFT, DELI, JIALIFT, LIANHE, MICROLIFT, KENGIC – the largest manufacturers will present modern equipment and solutions for logistics both at individual stands and inside regional pavilions.

CeMAT RUSSIA is currently the only stand-alone platform for the development and promotion of Russian developments for logistics and supply chain management: software, equipment and machinery. Among the domestic manufacturers offering new solutions at the exhibition will be companies such as EvoCargo, Automacon, Weybot Engineering, Neon Art, Robotech, QuadroPress Group (ZavSkлад) and many others will be present. For the second time, the Yandex Market Robotics Center will take part in the exhibition, which will present the latest equipment for automation of warehouse logistics.

For the fourth time, companies representing transport packaging, packaging equipment and automation of packaging processes will participate in the special TRANSPACK exposition. The number of exhibitors in this product category is steadily growing and this growth corresponds to the needs of visitors to the exhibition. The participation of such manufacturers as Attica Packaging, Galaxy, Resolute, Sealed Air Caustic, Smartpakservice, TARA, Iplast, ELTETE, SofPol, AIRPACKER and many others enhance the variety of services offered within CeMAT RUSSIA and confirm the importance of the TRANSPACK exposition as one of the key elements in the organization of the storage system and the transport and logistics chain.

In parallel with the exhibition part, a traditionally huge business program is expected, which includes 40 events of various formats and performances by over 100 speakers from various companies and independent experts.

The official partner of the business program will be SIBUR, whose packaging solutions are an integral part of ensuring automation and robotization of modern warehouses.

«We have decided to move away from the traditional and familiar event grid for CeMAT RUSSIA. Now it's 3 streams on 3 content platforms. Olga Kovaleva, Head of the business program, presents thematic areas: Processes. People and Technologies», says Robert Bakirov, Deputy General Director of DM RUS LLC. – «The specialists have only three busy days, during which they need to have time to familiarize themselves with the solutions of interest at the stands, discuss trends, negotiate and, hopefully, conclude profitable contracts. The new concept of the business program, in our opinion, allows you to build your work schedule at the exhibition as efficiently as possible and solve all business issues».

The program of the first day, September 17, will open with a Trend session «The present and future of intralogistics. Analytics and trends in the development of «smart warehouses». Opinion and assessment of industry leaders», organized jointly with CeMAT RUSSIA's long-time partner, the Coordination Council of Logistics (CCL). A Foresight session «The Future of Intralogistics and Supply Chains. Forecasts. Plans. Partnerships» will also be held in partnership with CCL.

Within the framework of the Strategic Session «Warehouse Logistics in the SCM system», experts, together with the Council of Supply Chain Professionals, will consider the warehouse link in the supply chain management system and determine its role in the effectiveness of the SCM as a whole. The partner of the session will be ANT Technologies.

The premiere of the Smart Warehouse Discussion Club will be presented in three parts, and COMITAS and SCAMATIC companies will be partners in one of the sessions

«Robotics in the warehouse: equipment, machinery and working practices». In general, in 2024, as part of the CeMAT RUSSIA business program, much attention will be paid to the topic of robotics. Expert sessions «Approaches to robotics. Warehouse storage and logistics», with the support of SBER Center for Robotics and «Robots: is there life in a warehouse? » in partnership with RONAVI ROBOTICS, will help to understand the impact of ubiquitous robotics on the development of intralogistics.

The organizers also note the importance of the thematic conference «Procurement of warehouse and production logistics: effective building of relationships between participants in the process. Key issues and the search for solutions», which will be organized in partnership with the Association of Procurement Management Professionals.

This year, the highly successful Solutions Gallery will continue its work, where a series of brief presentations of the latest developments from the exhibition participants will be presented to visitors. 17 themes of the Gallery of Solutions are waiting for visitors on September 17 and 18.

According to the established tradition, on September 18, CeMAT RUSSIA will host the All-Russian Final of warehouse equipment operators StaplerCup 2024, organized by RackFork company. According to the results of the qualifying tournaments and the All-Russian rating, the 60 best operators - winners of 6 qualifying regional tournaments, as well as the leaders of the All-Russian rating will take part in the Final. The audience will once again enjoy an unforgettable show and a demonstration of the highest professionalism from the masters of their craft. CeMAT RUSSIA thanks RackFork for its long-term partnership and the choice of our site for the 3rd time.

On the final day, CeMAT RUSSIA will present the Intellectual tournament «Beware of the Warehouse! » – an exciting business game for warehouse logistics professionals. The tournament is held in two rounds of 1.5 hours each with a break for networking. In each round, in an open format and friendly atmosphere, 7 teams are looking for solutions to difficult practical tasks in the field of warehouse logistics. Jungheinrich will be the general partner of the game, and Polyplastic Group will be the technical support partner.

Jungheinrich, AXELOT, SBER Robotics Center, InfoTech, LogistiX Group of Companies, TechnoSpark, InStock Technologies, SITEK, Axenix, MOLCOM, Yandex Robotics and others organize their expert discussions within the framework of the business program.

The general partner of the CeMAT RUSSIA exhibition is COMITAS, the first full-cycle system integrator and equipment manufacturer, which, in addition to logistics/technological design and equipment, independently develops software for

automation and robotization of warehouse and production logistics, adapting it to the individual needs of the client.

The 14th International Exhibition 14th International exhibition for materials handling, warehousing equipment and logistics CeMAT RUSSIA will be held from September 17 to 19, 2024 at the Crocus Expo IEC, Pavilion 1.

**The organizer of the exhibition is DM RUS LLC.**
